EASY DEPLOYMENT

LEOSAC

DESKTOP AUTHENTICATION

Overview

Leosac Desktop Authentication (LDA) adds contactless badge authentication (RFID / NFC) to Windows sessions.

Suitable for both standalone workstations and enterprise directories, Leosac Desktop Authentication meets growing requirements for user traceability and cybersecurity in the workplace.

Main Features

- RFID authentication / identification
- Local users or Active Directory
- Lock on badge removal
  or a second badge presentation
- Windows 10 and Windows 11
- Works with or without network access
- User traceability,
  including on generic accounts

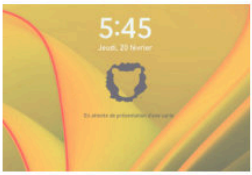

Badge Technologies

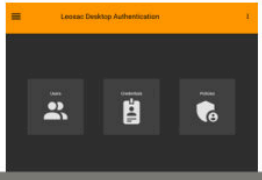

- MIFARE® Classic
- MIFARE® DESFire® EV2/EV3 and DUOX
- MIFARE® Ultralight C
- Most 125 kHz and 13.56 MHz badges
- STid Mobile ID

Other Technologies

- NXP SAM AV2 / AV3
- 2FA / MFA
- REST Web Services
- PC/SC and SSCP

LDA Datasheet - 2026
